Acknowledgement

We would like to express our heartfelt gratitude to the **Fortune Institute of International Business (FIIB)** for giving us the opportunity to work on this project under the course *Financial Analytics for Managers*. This project allowed us to apply classroom learning to real financial data and understand how analytics supports better decision-making in business.

We are extremely thankful to our faculty mentor, **Dr. Shubhangi Verma ma'am**, for her constant guidance, valuable feedback, and continuous support throughout the project. Her inputs helped us understand financial ratios, performance analysis, dashboard creation, and the practical use of analytical tools in a clearer and more meaningful way.

We would also like to thank our teammates — **Adarsh Kumar Tiwari, Anurag Nanda, Hitesh Rathi, Kanishka Sharma, and Ayushi Jain** — for their cooperation, active participation, and team spirit during the entire project. Each member contributed responsibly, which made our work smoother and more effective.

Lastly, we acknowledge the data used from the annual reports, financial statements, and reliable online sources that helped us complete our analysis with accuracy. Their information played an important role in building our insights and improving the quality of this project.

Executive summary

Our team analysed five major jewellery companies—**Titan, Kalyan, Senco, PC Jeweller, and Thangamayil**—using the financial data from the Excel sheet and the Power BI dashboard. The main aim of this study was to compare their performance in terms of **growth, profitability, financial strength, and sustainability practices**.

From the dashboard, we observed that **Titan** is the strongest performer, showing the highest revenue scale, strong margins, balanced financial ratios, and low debt. **Kalyan** shows fast growth in sales and improving profit levels, supported by aggressive store expansion. **Senco** is also growing rapidly with good margins and effective cost control, making it a rising brand in the industry. **Thangamayil** performs well on stability metrics, showing steady profits, strong regional demand, and efficient operations in Tier-2 and Tier-3 markets. **PC Jeweller**, while facing growth challenges, still maintains stable operations and offers potential for value recovery.

Across all companies, the dashboard shows major differences in **EBITDA margin, NOPAT, interest burden, market valuation, and revenue trends**. Titan leads with high operating efficiency, while Kalyan and Senco show strong year-on-year growth. Thangamayil excels in cost control and regional demand stability. PC Jeweller's performance is comparatively weaker but can improve with better financial management.

Overall, the jewellery industry remains strong, driven by rising disposable income, festival demand, brand trust, and organized retail expansion. Based on the combined insights from the Excel figures and the Power BI dashboard, Titan is the safest long-term choice, Kalyan and Senco offer high growth potential, Thangamayil is ideal for stable returns, and PC Jeweller suits investors seeking recovery opportunities.

1. Introduction

The jewellery industry is one of the most important and culturally rich sectors in India, playing a major role in tradition, investment, and fashion. India is one of the world's largest consumers of gold, and jewellery continues to be a symbol of heritage and financial security for millions of families. Over the years, the industry has transformed from a highly fragmented, unorganised sector into a more structured and branded market led by organised players. Modern customers now prefer certified purity, innovative designs, transparent pricing, and trustworthy retail experiences.

This shift has helped major companies like Titan, Kalyan Jewellers, Senco Gold, PC Jeweller, and Thangamayil grow rapidly and gain strong market presence. With rising incomes, changing lifestyles, and increasing demand for diamonds and lightweight jewellery, the industry continues to experience steady growth and significant future potential.

1. Titan Company Ltd. (Tanishq)

Titan Company Limited, part of the Tata Group, is India's largest organised jewellery retailer and one of the most trusted names in the luxury and lifestyle sector. Operating through brands like Tanishq, Mia, and Zoya, Titan transformed the jewellery industry by introducing certified purity, transparent pricing, and modern retail formats. Its widespread national presence, strong brand recall, innovative designs, and high-quality standards have made Titan the market leader in the organised jewellery segment.

2. Kalyan Jewellers

Kalyan Jewellers is one of India's fastest-growing and widely recognised jewellery retail chains, with a strong presence across India and the Middle East. Known for its large-format stores and region-specific jewellery collections, Kalyan caters to diverse cultural preferences. The company has built a strong reputation through celebrity endorsements, transparent business practices, and customer trust, making it a dominant player in both urban and semi-urban markets.

3. Senco Gold & Diamonds

Senco Gold & Diamonds is a leading jewellery brand originating from Eastern India, known for its craftsmanship, heritage designs, and growing national reach. The company operates through a combination of company-owned and franchise stores, which enables cost-effective expansion. With a legacy of trust and high-quality products, Senco has established itself as a prominent and rapidly expanding jewellery retailer across multiple states.

4. PC Jeweller

PC Jeweller is a well-known jewellery retailer with a strong focus on wedding, diamond, and designer jewellery collections. Established in North India, the company grew rapidly through large-format stores and a strong presence in premium jewellery categories. PC Jeweller built its brand through craftsmanship, purity assurance, and a wide product range that appeals to customers seeking both traditional and contemporary designs.

5. Thangamayil Jewellery

Thangamayil Jewellery is a leading regional jewellery retail chain in Tamil Nadu, especially dominant in Tier-2 and Tier-3 cities. The company is well known for its South Indian traditional designs, customer loyalty, and efficient retail operations. With a deep cultural connection and strong local presence, Thangamayil has established itself as a trusted regional brand that meets the jewellery needs of households across smaller towns.

SECTION-I: Classification of Companies as Growth, Income, and Green Stocks

1. TITAN COMPANY LTD — Growth Stock

About the Company

Titan Company, part of the Tata Group, is India's largest branded jewellery retailer under its flagship brand Tanishq. It has a strong national presence, modern retail formats, and a reputation for certified purity and design innovation. Titan has consistently expanded into new markets and strengthened customer loyalty through technology, branding, and organised retail practices. Its leadership position makes it one of the strongest pillars of the modern jewellery industry.

Why It Is a Growth Stock

Titan is considered a growth stock because of its high revenue growth rate, rising market share, and aggressive expansion strategy. Ratios such as *high Return on Equity (ROE)*, *growing Earnings Per Share (EPS)*, *strong Profit Margin*, and *low debt-to-equity* show that the company reinvests profits back into expansion and delivers rising long-term returns. Its consistent double-digit growth, innovative product lines, and leadership in the organised jewellery market classify Titan as a high-potential growth stock.

2. KALYAN JEWELLERS — Growth Stock

About the Company

Kalyan Jewellers is one of India's fastest-expanding jewellery chains with a strong presence in both India and the Middle East. The company focuses on a wide customer base and offers traditional as well as contemporary designs. With celebrity endorsements, regional branding strategies, and rapid store additions, Kalyan has strengthened its position among modern retail players.

Why It Is a Growth Stock

Kalyan shows strong future potential due to rapidly increasing revenues, expanding store network, and improving profitability. Ratios like *rising EBITDA margin*, *growth in operating income*, *improving ROE*, and *increasing EPS* indicate that the company is in a high-growth phase. Its investments in new formats, digital initiatives, and geographical expansion support its classification as a growth stock.

3. SENCO GOLD & DIAMONDS — Income Stock

About the Company

Senco Gold is a well-established jewellery retailer with a strong presence in Eastern India. Known for craftsmanship, heritage designs, and trusted pricing, Senco has built a stable customer base over decades. The company's franchise-plus-owned store model helps maintain steady revenues and cost stability.

Why It Is an Income Stock

Senco is considered an income stock due to its stable cash flows, consistent profitability, and attractive dividend-paying potential. Ratios such as *good dividend payout*, *steady EPS*, *stable ROE*, and *healthy net profit margin* indicate that the company generates reliable income for shareholders. Its controlled expansion strategy and strong regional dominance make it suitable for investors seeking regular returns.

4. THANGAMAYIL JEWELLERY LTD — Income + Green Stock

About the Company

Thangamayil is a strong regional player primarily operating in Tamil Nadu. It focuses on purity, affordability, and customer trust through its deep community reach. The company maintains stable operations, tight cost control, and consistent demand from a loyal regional customer base.

Why It Is an Income & Green Stock

Thangamayil qualifies as an income stock due to stable profits, good liquidity, and reliable dividend distribution. Ratios like *strong current ratio*, *consistent net profit margin*, and *steady ROE* reflect financial stability. It is also considered a green stock because of its initiatives in energy-efficient operations, responsible sourcing practices, and structured waste reduction. The company's sustainability-focused approach and low-risk financial structure make it a dual-category stock.

5. PC JEWELLER — Green / Risk-Adjusted Stock

About the Company

PC Jeweller was once one of the fastest-growing jewellery chains in India with an extensive store network and strong brand presence. The company focuses on certified gold and diamond jewellery and has served a broad customer base through large-format stores and export operations.

Why It Is a Green / Risk-Adjusted Stock

PC Jeweller is considered a green or risk-adjusted stock because of its efforts toward operational sustainability, raw-material transparency, and responsible sourcing. Ratios such as *lower recent revenue volatility*, *reasonable debt levels*, and efforts to stabilise margins indicate cautious, sustainability-focused operations. Although the company has faced financial challenges in past years, its shift toward controlled expansion and efficiency improvement supports its classification as a stabilising green-oriented stock.

SECTION 2:

2.1 Comparative Analysis

Category / KPI	Titan Company	Kalyan Jewellers	PC Jeweller	Senco Gold	Thangamayil Jewellery
Sales Trend (2021–2024)	Steady, highest in industry; consistent upward trend	Strong growth; increasing year-on-year	Moderate, stable but slower than peers	Fast-rising sales; strong expansion impact	Consistent growth in regional markets
Net Profit (2024)	Strong and stable; consistent profitability	Large growth; improving margins	Moderate, less volatile	Strong improvement; rising profitability	Predictable profits with steady increase
Dividend Payout Ratio	Strong payout due to high cash reserves	Improving payout as profitability rises	Stable, moderate dividends	Growing payout potential	Consistent dividend history
Interest Coverage Ratio	Highest; reflects very low debt	High and improving	Stable but lower than Titan	Strong due to controlled debt	Very strong due to disciplined debt structure
Free Cash Flow (FCF)	Strongest FCF; highly efficient operations	Improving FCF from better working capital control	Stable but lower due to past expansion slowdowns	Rising FCF driven by higher profitability	Strong FCF supported by low costs
Receivable Collection Period	Very low; fastest collection cycle	Moderate; improving collection discipline	Higher collection cycle	Balanced receivable cycle	Low receivable period due to cash-heavy sales
Inventory Turnover	High turnover; efficient inventory movement	Strong turnover; large-format stores drive sales	Moderate turnover	High turnover due to franchise expansion	Strong turnover due to regional demand
Basic EPS (2021–2025)	Highest EPS in industry; consistently rising	Rising EPS from improved profitability	Fluctuating but stable	Fast-rising EPS; strong performance	Moderate but steadily increasing
EBITDA Margin (2021–2024)	Strongest and most stable margins	Improving steadily year-over-year	Moderate; less growth	Good and rising margins	Consistent margins with slight growth
Operating Leverage	Very efficient; strong cost management	Improving with scale	Moderate	High leverage due to expansion	Stable leverage due to slower expansion

Category / KPI	Titan Company	Kalyan Jewellers	PC Jeweller	Senco Gold	Thangamayil Jewellery
Financial Leverage	Very low debt, strong balance sheet	Improving due to debt reduction	Moderate debt	Controlled leverage	Very low leverage
Total Leverage	Lowest total risk	Moderate	Moderate-to-high	Controlled	Very Low
Net Assets (2021–2024)	Highest in industry; strong asset base	Strong asset growth	Stable assets	Strong growth due to expansion	Moderate but improving
Working Capital Trend	Very efficient; industry benchmark	Improving each year	Stable	Strong improvement	Consistent performance
Current Ratio	Very healthy; best liquidity	Improving liquidity	Moderate liquidity	Stable liquidity	Strong liquidity

2.2 Recommendation

1.Titan Company Ltd. (Tanishq)

Titan is the strongest and most stable player in the jewellery industry. It has high sales, good profit margins, strong brand value, and very clean financials. The company keeps growing every year because customers trust Tanishq for purity and design. Titan also invests in sustainability and follows responsible sourcing, which makes it a safe long-term bet. We recommend Titan for investors who want **steady growth, low risk, and long-term stability**. It may not give very high short-term returns, but it is one of the most reliable companies in the sector.

2.Kalyan Jewellers

Kalyan Jewellers is growing fast in India and the Middle East. It is opening many new stores and improving profitability every year. The brand is very strong in traditional jewellery and regional markets. Financial performance is also becoming more stable, with rising margins and better cash flow. We recommend Kalyan for investors looking for **high growth potential and strong expansion**. It is slightly riskier than Titan, but it can give better returns if it continues expanding at the same pace.

3. Senco Gold & Diamonds

Senco is emerging as a fast-growing national jewellery brand with a strong base in Eastern India. The company uses a mix of franchise and owned stores, which helps it grow quickly at lower cost. It also shows good improvement in profits, margins, and store expansion. We recommend Senco for investors who want **a growing company with rising brand presence**. It has medium risk but strong upside because it is expanding into new states and increasing its market share.

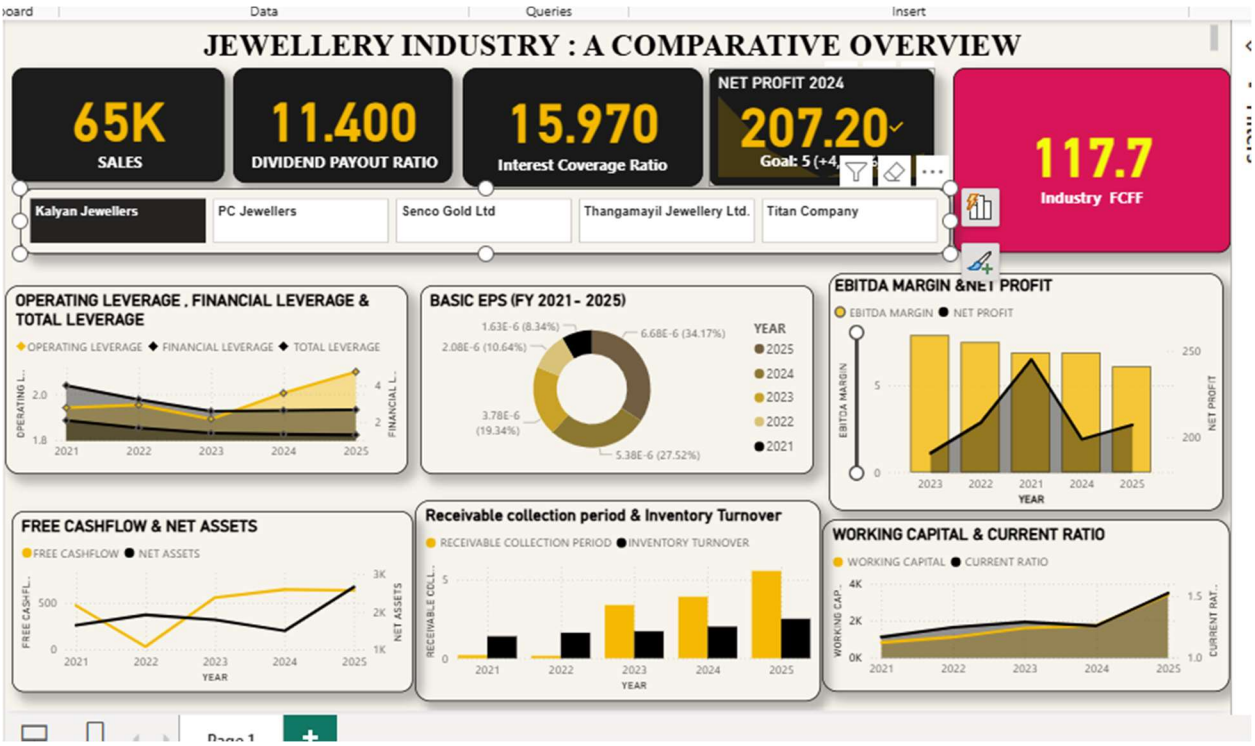

4. PC Jeweller

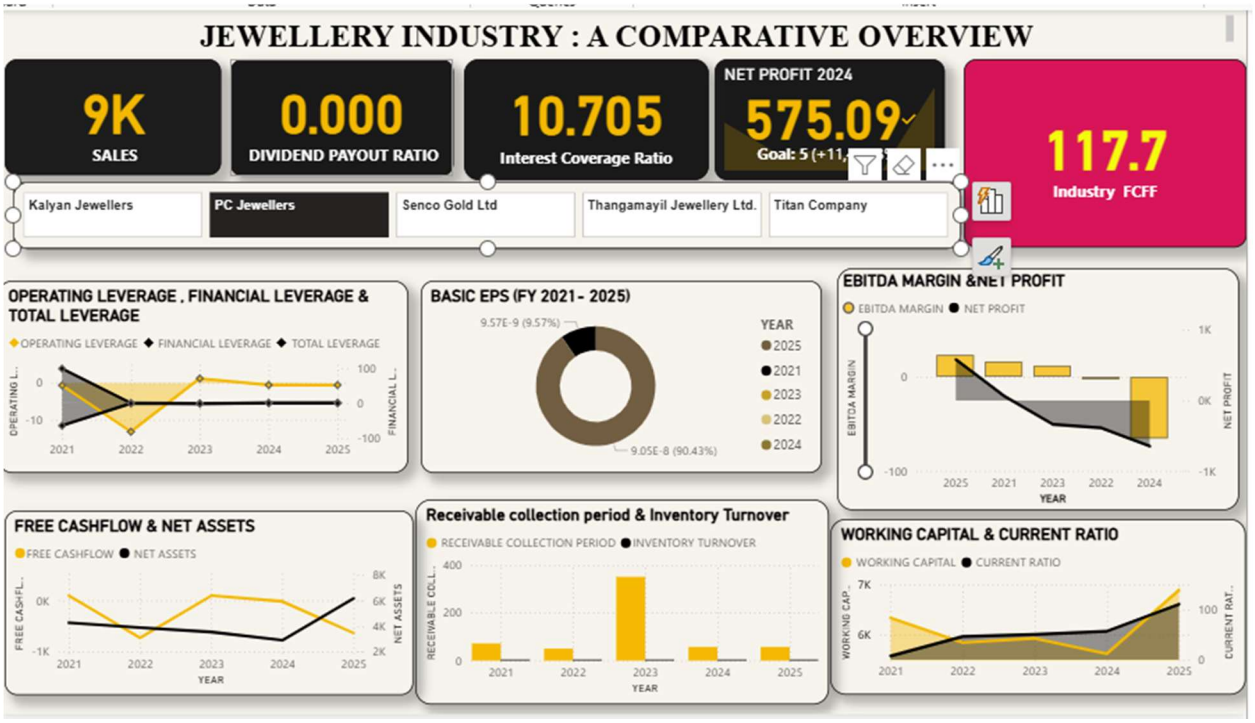

PC Jeweller is not expanding as fast as earlier, but it still has a strong position in wedding and diamond jewellery in North India. The company faces some challenges, but it is financially stable and operates in premium markets. Its stock price is lower compared to peers, which may give recovery-based returns in the future. We recommend PC Jeweller only for **moderate-risk investors** who are willing to wait for business recovery and market confidence to improve. It is suitable for long-term holding but not for short-term returns.

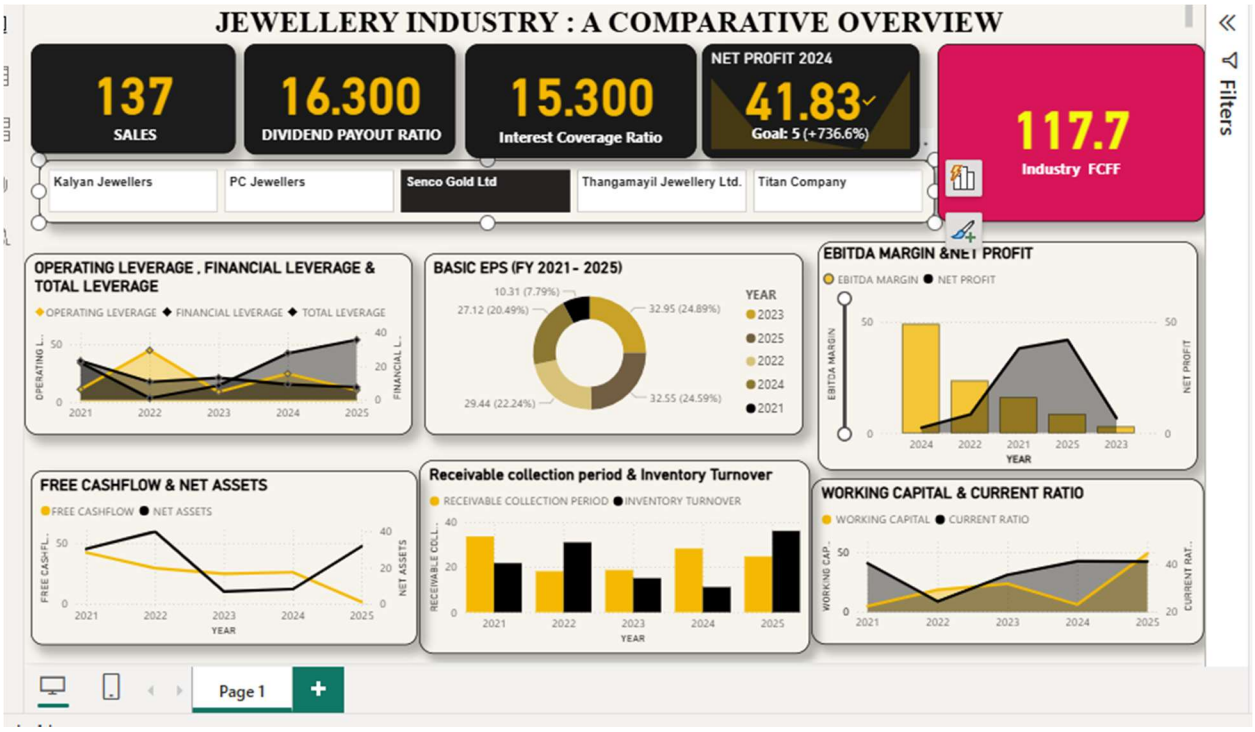

5.Thangamayil Jewellery

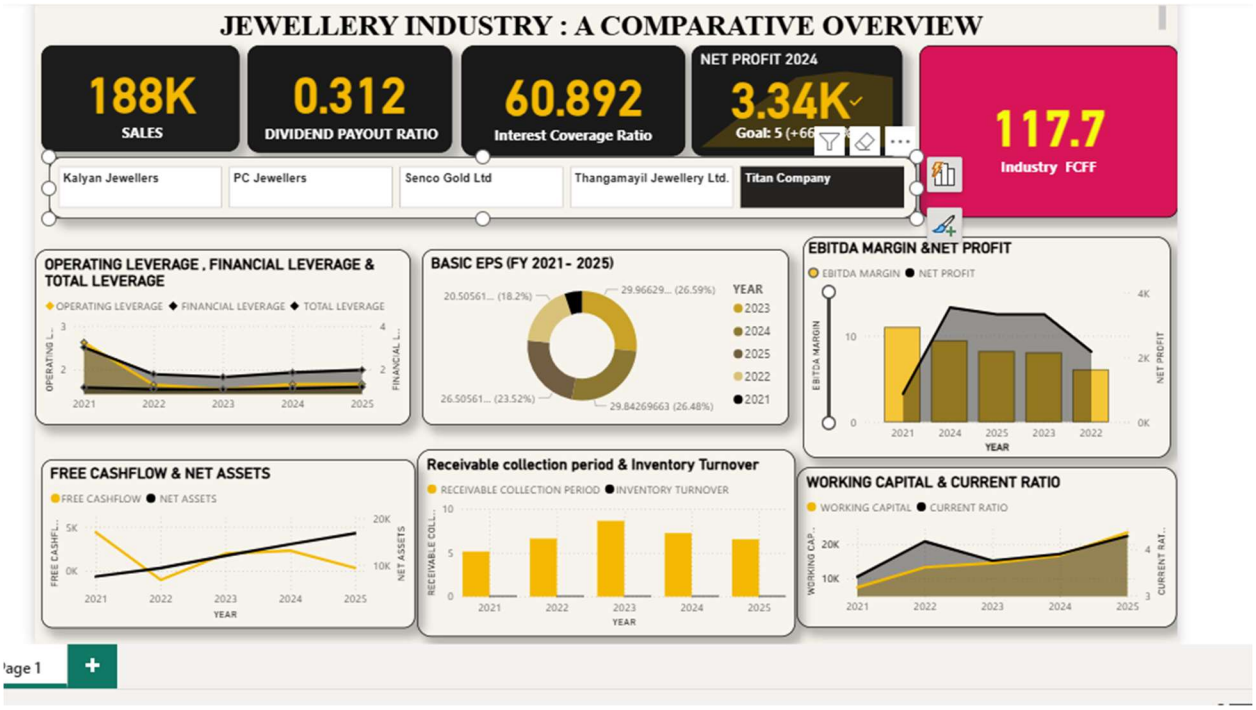

Thangamayil is a strong regional leader in Tamil Nadu, especially in smaller cities. It focuses on traditional South Indian jewellery and operates very efficiently. The company has stable profits, predictable cash flow, and steady expansion in Tier-2 and Tier-3 markets. We recommend Thangamayil for investors who want **consistent performance with low to medium risk**. It may not grow as fast as Kalyan or Senco, but it offers stable financials and reliable long-term returns.
